

MUHAMMAD TALHA

Full Stack Web Developer | CS Student at FAST NUCES

Faisalabad, Pakistan | mtalha.mt236@gmail.com | [GitHub](#) | [LinkedIn](#)

ABOUT ME

I am a 6th semester BS Computer Science student at FAST NUCES with a strong passion for building full-stack web applications. I have experience in designing RESTful APIs, creating responsive user interfaces, and developing scalable web solutions. I am proficient in JavaScript, Python, and C++, with hands-on experience in the MERN stack. I am actively seeking a Full Stack Web Development internship where I can contribute to real-world projects and further grow in a professional environment.

EDUCATION

Bachelor of Science in Computer Science

FAST NUCES, Chiniot-Faisalabad Campus

Expected: June 2027

TECHNICAL SKILLS

Frontend	React.js, Next.js, Tailwind CSS
Backend	Node.js, Express.js, RESTful APIs, JWT Auth
Databases	MongoDB, SQL (MySQL / PostgreSQL)
Languages	JavaScript, Python, C++
Tools & Platforms	Git, GitHub, VS Code, Jupyter Notebook
Soft skills	Communication, Problem Solving, Teamwork

PROJECTS

Split-Nest | Full Stack Bill Splitting App

- Smart bill-splitting web app enabling groups to manage shared expenses with real-time tracking and automatic split calculations.
- Implemented JWT-based user authentication, group creation, and persistent expense history using MongoDB.
- Built RESTful APIs with Node.js/Express and a responsive React.js + Tailwind CSS frontend.

Core Banking System | Full Stack Financial Platform

- Comprehensive banking platform supporting account management, fund transfers, and detailed transaction history.
- Implemented secure JWT-based authentication with role-based access control for customers, tellers, and managers.
- Built scalable RESTful APIs with Node.js/Express and MongoDB; designed intuitive dashboards using React.js and Tailwind CSS.

Smart Campus AI System | Python AI Project

- AI-powered campus management tool using Python to automate and optimize campus operations.
- Integrated intelligent scheduling, resource allocation, and student assistance features using ML models.
- Utilized Jupyter Notebook and Python libraries (Pandas, NumPy, Scikit-learn) for data processing and predictions.

CURRENT PROJECTS

Eventra | Event Management Platform

- Full-featured event management web application supporting event creation, registration, and attendee tracking.
- Building with React.js frontend, Node.js/Express backend, and MongoDB for scalable data management.
- Implementing role-based access for organizers, attendees, and admins with real-time event update.
